

tri-sāhasra-mahāsāhasra, adj. m. or (°rā) f., or in comp., with lokadhātu (which in BHS is both m. and f., in Pali app. only f.; cf. Pali sahasā, see BHS **tri-sāhasrī**, also **ti-**, **mahā-**, which acc. to Childers are synonyms in Pali; no numeral mahāsahasra seems recorded in BHS and it is not clear what precise mg., if any, attaches to mahāsahasra; in Mvy 7999 ff. and Mmk 343.16 ff. mahā-cpd. with other numbers means ten times the number), (world system) consisting of a 'triple thousand great thousand' (worlds): °ra-lokadhātu, cpd., LV 319.3; 377.4; Suv 8.6, 9; 86.4; masc. forms, °ro, °ram (acc.), etc., Mvy 226; 3044; LV 276.19; 393.18; 405.2; 410.12, 22; Mv i.40.6; ii.300.16 (mss.); 301.2, 8 (mss.); 349.3 (mss.); prec. by fem. adj.; Divy 68.23; 139.3; 158.6; 266.14; 367.21; Av i.5.10; 11.8 etc.; Samādh 8.9; 19.6; RP 2.11; fem. forms, Mv i.214.12 = ii.17.11 °rāyām °dhātūyām (loc.); ii.281.16; 301.12; 314.10; Suv 87.6 °rāyām °dhātu; Śikṣ 138.10 id.; see also **trisahasra**, and items here adjoining.

trisahasramahāsāhasrika, adj., with mahābrahmā, (ruler) of a lokadhātu consisting of 3 thousand great thousand (worlds): °ko mahābrahmā imam trisahasramahāsāhasram lokadhātum . . . samam adhyatīṣṭhat LV 276.19.

tri-sāhasrā (sc. lokadhātu), = °srī: °srām bahurat-nādhārām . . . Mv i.80.9 (prose); imām °rām i.236.15 (vs); °srāya yāvātā (see this) ii.302.20. No noun expressed.

tri-sāhasrika, f. °kā, adj. with lokadhātu (cf. adjoining items), consisting of three thousand (worlds): sarva-°ka-lokadhātu Suv 149.13 (vs); °kāyām mahāsāhasrikāyām lokadhātu Suv 100.9 (vs; analysis of **trisahasra-mahāsāhasra**).

tri-sāhasrī, f. (sc. lokadhātu; cf. °srā), the three-thousandfold (world-system): yaś ca imām trisāhasrīm (so most mss., two °rām) . . . kampayet SP 253.7. Only here and in Dbh.g. 40(66).4 trisahasri have I noted the fem. (tri-, or mahā-)sāhasrī(-sah°), corresp. to Pali sahasā, which app. is the regular Pali form, see Childers s.v. Otherwise the BHS fem. stem is °srā, see preceding items.

Triskandha-, perhaps = next, but prob. rather in the sense of **skandha** (3), q.v., in °dha-patha-deśika (Mironov °daisika), a title of Buddha: Mvy 74.

Triskandhaka, nt. (cf. prec.), n. of a work: °kam Mvy 1384; °ka-dharmaparyāya-pravartanena Śikṣ 171.5; °ka-pravartanam 290.1.

trihsahasrā (only f.) = **trisahasrā**, see °ra; like the latter only in vss, and °sah° presumably m.c. for °sāh°; printed in LV 368.7 (°rā), 11 (°rā) and 21 (°rām, here with medini = °nīm); all mss. in 7 and 21, and all but one (A, the best) in 11, read tri-sah°, unmetr., Lefm. em. m.c.; tri° would be equally satisfactory but A trih° in 11; trihs- can be interpreted as doubling of the sibilant m.c., but doubtless influence of tris, thrice, is involved. No noun accompanies the (substantivized) adj. in 7, 11.

trihika, adj. (§ 3.115; cf. Pali dviha-tīham, adv., and **trehika**), (sufficient) for three days (to Skt. tri plus aha-n), with śālī, rice (as food): °kam Mv i.343.11, 12, 14, so Senart (em. °ko in 14); mss. mostly trehika, once tri° once tri°.

(**truṭi** (f.), Skt., so read with v.l. for Lefm. **truṭi**, a small particle: LV 149.4; as a unit of measure, here = 7 anu, one-seventh of a **vātāyana-rajās**, q.v., which in LV is one-seventh of a **śaśarajās**; Tib. rdul chuñ ñu = small speck. Not in corresp. Mvy list, 8190 ff.; possibly cf. Tib. chu rdul = **ab-rajās** 8193, water-speck, between loharajās and śaśarajās, not in LV; can a corruption have occurred based on Tib. chuñ, small, and chu, water?)
